EXPERIENCE

IT Technician

Egyptian Police Academy

Oct 2021 – Nov 2022

- Served as a technical support technician during military service, assisting with system crashes, network issues, malware removal, and software configurations
- Diagnosed and solved problems with printers, copiers, storage media, and other peripheral devices
- Earned commendations for teamwork, flexibility, and work excellence in providing IT support to police officials

Web Administrator Intern

Opatrip Lithuania

Jan 2021 – Jul 2021

- Implemented the integration of a booking system on the website's frontend, thereby creating new revenue streams
- Maintained upkeep of over 200 products on WordPress, keeping customers up to date on product details
- Supervised and delegated interns in performing basic overhead tasks as part of management role

Systems Analyst Intern

TBS, Birds Cage Food Products, Givaudan

Feb 2019 – Jun 2021

- Undertook a variety of academic projects pertaining to small and medium-sized businesses in Egypt during the course of university degree
- Developed high-fidelity prototype systems by conducting feasibility studies, system analyses, database designs, and SRS documentation

PROJECTS

Weather App | *JavaScript, Bootstrap, Webpack, API*

- Integrated 3rd party weather API into a web app, enabling users to filter for matching cities in less than 30ms

Live Chatroom | *Async JS, Firebase, Git*

- Built a full-stack chatroom app resembling Discord using Google's Firebase database for message storage

UI Library | *Bootstrap, JavaScript, CSS*

- Developed a small user interface library with reusable JavaScript components

Tourism site | *HTML, CSS animations, NPM*

- Designed and developed a mock-up website using only HTML and CSS with Sass
